DISCOVERING ADHD

Many children go through phases where they are restless or inattentive. This is often completely normal and does not necessarily mean they have ADHD.

Symptoms of ADHD tend to be first noticed at an early age, and may become more noticeable when a child's circumstances change, such as when they start school. Most cases are diagnosed in children between the ages of 6 and 12.

Childhood ADHD is more commonly recognised & diagnosed in boys than girls. Girls with ADHD often have a form of the condition where the main symptoms relate to problems with attention rather than hyperactivity, which can cause less noticeable symptoms.

Children with ADHD can become easily frustrated because of executive function difficulties.

ADHD is a complex neurodevelopmental condition, a brain disorder due to lack of dopamine, which starts during child development but frequently persists through adolescence and into adulthood.

ADHD frequently occurs alongside other conditions (**comorbidities**) such as anxiety, autism, depression, dyslexia, dyspraxia, epilepsy, sensory processing disorder, Tourette's syndrome and especially in cases of untreated ADHD or late diagnosis - oppositional defiant disorder (ODD)

People with ADHD may also have additional problems such as sleep.

ADHD can occur in people of any intellectual ability including both those who are gifted (dual exceptionality) and those with learning difficulties. Remember, children with ADHD are different from one another in both their needs and the support or services required to meet them

Criteria

For someone to be diagnosed, he or she must have suffered at least six (or more) of the following symptoms before the age of 12. The symptoms must also exist for six months or more and to a degree that is different from those considered normal for similarly aged children in an academic environment or extracurricular activity.

- Often fails to pay attention to details or makes careless mistakes in schoolwork, at work, or during other activities
- Tends to have difficulty sustaining attention during tasks or recreational activities, such as in class, in conversations, or during prolonged reading
- Does not seem to listen when spoken to directly, and seems to have other things on his or her mind even when there is not an obvious distraction
- Fails to follow instructions and finish schoolwork, chores, or work duties (may start work but be distracted quickly and easily evade it)
- Has difficulty organising tasks and activities and putting belongings in order. He or she neglects work, has poor time-management skills, and does not meet deadlines
- Avoids and dislikes tasks that require sustained mental effort, such as schoolwork or chores

- Often loses things necessary for tasks or activities, such as school supplies, pencils, books, tools, wallet, keys, working papers, glasses, or mobile phones
- Easily distracted by external stimuli
- Forgets daily activities, such as homework or doing errands, or in older teens and adults, returning calls, paying bills, or keeping appointments

The symptoms are not solely a manifestation of oppositional behavior, defiance, hostility, or failure to understand tasks or instructions. To be diagnosed with ADHD, a person must also show six or more of the following symptoms of hyperactivity and impulsivity:

- Fidgets with hands or feet or squirms in seat
- Frequently gets up in situations where he or she is expected to remain seated
- Runs around or climbs in situations where it is not appropriate (in teens or adults, this may be limited to fidgeting)
- Unable to quietly play or engage in leisure activities
- Typically too “busy”, acting as if he or she has to do things
- Talks excessively
- Often responds unexpectedly or before a question is concluded or finishes someone else’s thought
- Has difficulty waiting his or her turn
- Interrupts or intrudes on others; distracts others or does not realise he or she is bothering anyone

Keep in mind that the symptoms must also meet these criteria:

- Be present for at least six months
- Have started before the age of 12
- Be present in two or more places, such as at school and in the home
- Negatively affect day to day life
- Not occur solely due to a psychotic condition
- Not be better explained by another mental condition

If your child is presenting, as described, you should consider raising your concerns with your child’s teacher, their school’s special educational needs co-ordinator (SENCo) or your GP

The [Single Point of Access \(SPA\)](#) is the first port of call for diagnosis of ADHD. In Richmond call 020 8891 7969 for advice from 8am to 6pm, Monday to Friday, or 020 8770 5000 out of hours

For Kingston: contact 020 8547 5008 or 020 8770 5000 out of hours

What happens in an assessment?

The young person, parents/carers & schools are asked to complete questionnaires to assist professionals decide if a medical diagnosis is necessary or if there are other ways to help. Then a conversation will be arranged to find out more about the young person today and in earlier childhood. There’s no need to prepare; simply explain what your life is like at home and at school

Making a diagnosis requires a specialist assessment, usually done by a child psychiatrist or specialist paediatrician. The diagnosis is made by analysing patterns of behaviour, observing the child, obtaining reports from home and at school.

Receiving a diagnosis of ADHD for your child or teen can be a huge relief, or indeed a big cause for concern. A diagnosis can help when explaining your child's condition to other people. It can also make it easier when you are stating your case to obtain appropriate support and access to services. This may include: obtaining an Education, Health and Care Plan; accessing medical and social services; reasonable adjustments under the Equality Act; and obtaining disability-related funding.

Assessment & diagnosis is usually accessed via the NHS. Unfortunately, there is often a long waiting list – as a result some parents/carers decide to go privately. Your GP may be able to recommend psychiatrists who practice privately and here are some contacts we know:

Prof Peter Hill - The First Floor, 127 Harley Street, London W1G 6AZ Tel: 020 7486 2332

Dr Claire Scott is a consultant community paediatrician who as well as working for Hounslow and Richmond Community Care has a private practice. Tel: 07796 783007

The Effra Clinic is based in London and it specialises in ADHD and autism spectrum disorder. The staff includes two consultant child and adolescent psychiatrists with a shared passion and specialism in ADHD and ASD. Tel: 020 3322 5532 Email: admin@effraclinic.co.uk

LANC - Learning Assessment and Neurocare Centre, 60 Bloomsbury Street, London 01403 240002
Email: info@lanc.uk

Nicola Ryan Mental Health Nurse Tel: 07866 388935 Email: nickishouse266@hotmail.com

Remember though if you receive a private diagnosis and the consultant recommends treatment with meds, then your GP needs to refer you via SPA to Camhs tier 3 for treatment

COMORBIDITIES

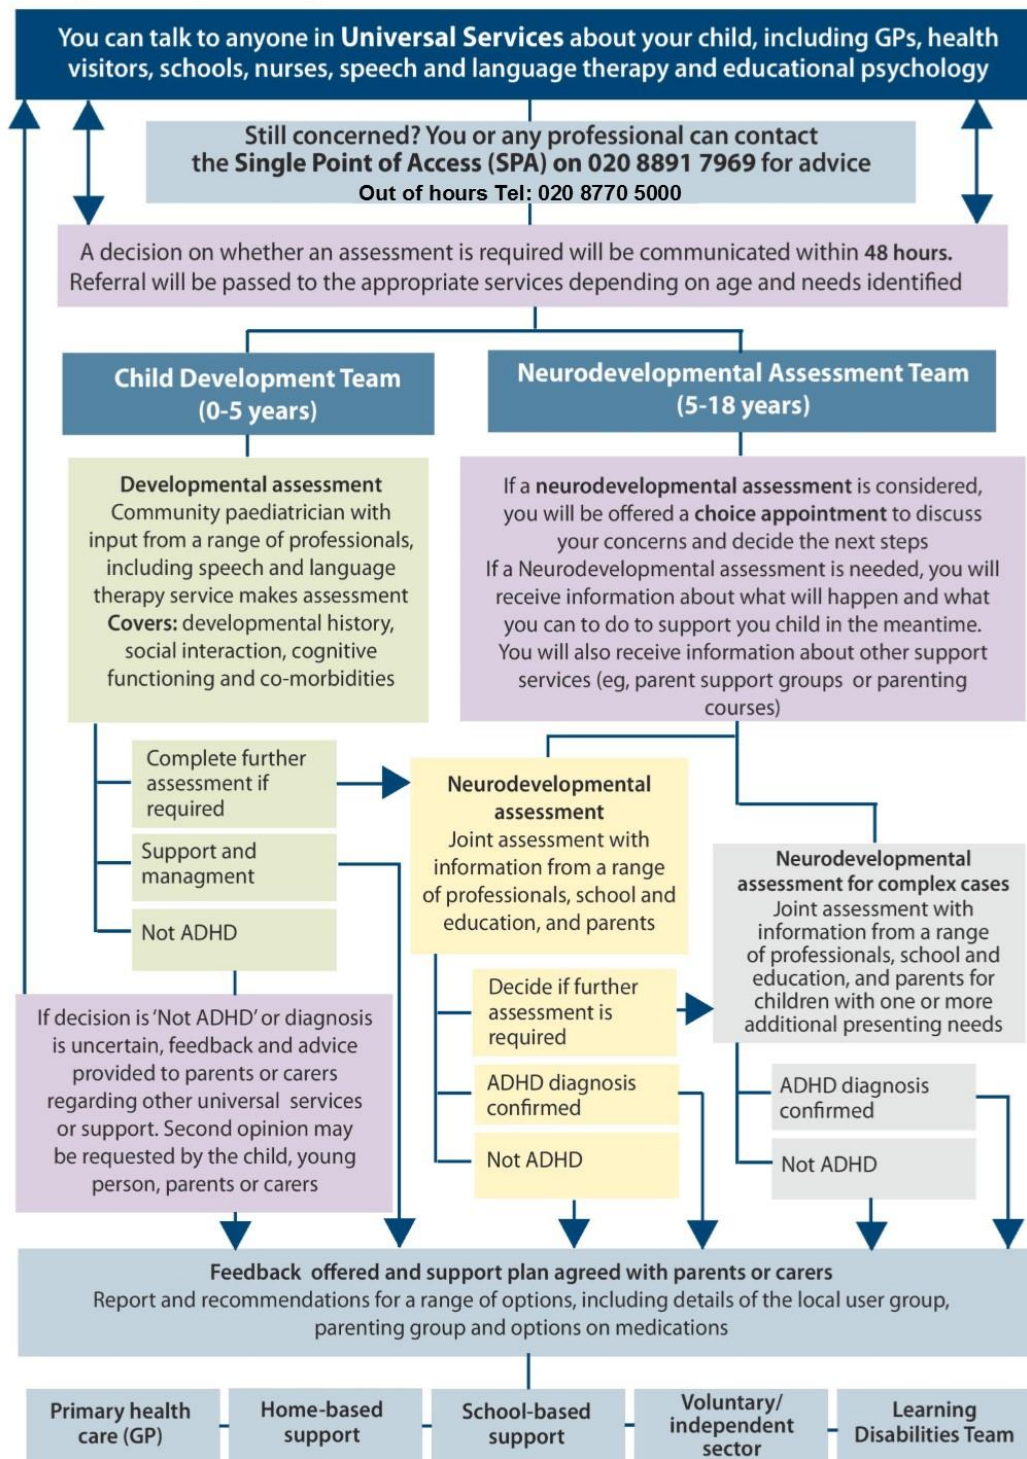

Comorbidity is the medical term for two or more disorders that occur at the same time. In general, individuals affected by **ADHD** often have other behaviour disorders that impact their ability to function successfully. The comorbidity of ADHD with other disorders is between 60% and 80%. When comorbid conditions are present, it can make the diagnosis of ADHD much more difficult to pinpoint and the symptoms harder to treat. Some comorbid disorders that commonly occur alongside ADHD are: Anxiety, [Autism](#), [Bipolar Disorder](#), Conduct Disorder, Depression, [Dyslexia](#), [Dyspraxia](#), [Obsessive Compulsive Disorder](#), Oppositional Defiant Disorder, Sensory Integration Disorder, Speech/Communication problems, [Tourette's Syndrome](#)

We at **ADHD Richmond** are always on hand to help and guide you. Visit our resource website @ www.adhdrichmond.org where you'll find extensive detail and contacts; Follow our Facebook page @ www.facebook.com/adhdrichmond and Twitter @ <https://twitter.com/AdhdRichmond> Email: communications@adhdrichmond.org

This is the diagnostic pathway, outlined by Achieving for Children (Richmond and Kingston's children's services), you will need to follow:

Information for parents

Diagnostic pathway for children - ADHD

If your child has been given a diagnosis of ADHD, it is very natural to want to find out more about the condition. Best practice is for diagnosticians to offer a programme of follow-up support, including advice, and signposting to other services e.g. behaviour training for parents

A child with ADHD needs intervention across all situations where the difficulties occur including at home, school, with friendships, and in the community.

It is very important for the family, teachers and professionals to understand the child's condition; how it affects them; and management strategies. As they grow up, the young person needs to be aware of their condition and how to manage it.

Many children and young people could benefit from specific strategies and therapeutic intervention including:

Art Psychotherapy

offered by the [Emotional Health Service](#) working with children with ADHD and their parents. Contact SPA
Tel: call 020 8891 7969 or 020 8547 5008 Out of hours Tel: 020 8770 5000

Challenging behaviour

Here are some information leaflets, from [The Challenging Behaviour Foundation](#), which will guide you to some best practice: Sheets [1](#) [2](#) [3](#)

Cognitive behavioural therapy (CBT)

[CBT](#) is a type of talking therapy that attempts to change how people think (cognitive) and what they do (behavioural). CBT can be sought for ADHD but some find it very difficult to do. It can either be carried out one-to-one with a therapist or in a group setting. This is what the Manager at CAMHS Richmond says "CBT is offered at T3 CAMHS and at T2 provided by the AFC Emotional Health Service, as part of the evidence-based practice care pathway. Referral to CAMHS is via the [AFC website](#). We assess and discuss with families the interventions available, based on assessment and need. CBT is part of what is available."

You may download this free eBook on [Cognitive Behaviour Intervention](#) and this free Workbook from [Pesky Gnats](#) or try this online payable course from [Brave Online](#) and here is our friend, Dr Jade Smith's, book on [Adapting CBT for Children with ADHD](#) Find a [therapist](#) and our friends at [The Effra Clinic](#) and [Nicola Ryan](#) offer CBT

Counselling and psychotherapy

The symptoms of ADHD can result in a variety of challenges ranging from broken friendships to low self-esteem to anxiety or depression. Long or short-term counselling may help some to process feelings and develop strategies for dealing with the effects of ADHD. Private psychotherapists can be found [here](#)

Diet

There is no concrete evidence to suggest that ADHD is caused by bad diets or too many additives. Children can react badly to any of a range of foods, and it can be different for each individual child. Sometimes additives are the culprit but sometimes it can be natural foods such as wheat flour, cow's milk or citrus fruit. Doctors are not sure how many children with ADHD are affected by reactions to food but most think it is a small minority

Sugar: There is no evidence that sugar affects ADHD.

Fish oils: Science has not fully answered this one yet. There is some evidence emerging that fish oils can be helpful in treating ADHD, but as yet there is no large-scale study to prove or dispute its effectiveness

Dietitians can provide advice and information about nutrition and diet. Your GP, paediatrician or hospital consultant should be able to make a referral to a dietitian, or you can find one who works privately via the [British Dietetic Association](#)

Emotional Health Service works with children and young people up to the age of 19 years old who have a Richmond or Kingston home address. The focus of this [service](#) is early intervention and prevention, including consultation, training and short term direct therapeutic interventions. Contact SPA Tel: call 020 8891 7969 or 020 8547 5008 Out of hours Tel: 020 8770 5000

Exercise

Even half an hour a day of regular physical activity decreases the severity of ADHD symptoms and improves cognitive functioning in children. It has a positive, measurable impact on their focus and mood. Exercise isn't a miracle cure for ADHD, but it can make a contribution to a child's functioning better and feeling better, and it's definitely something worth trying. Exercise breaks for children with are recommended. See our ACTIVITIES section

Herbal Medicine

This may offer benefits for children with ADHD, for example in the areas of stress & sleep problems. Contact [The National Institute of Medical Herbalists](#) Tel: 01392 426022 Email: info@nimh.org.uk

Homeopathy

This may also help with conditions such as dietary and sleep problems. Ask your GP or other healthcare professional for a contact. It is also possible to search for a local homeopath through [The Alliance of Registered Homeopaths](#) Tel: 01825 714506 Email: info@a-r-h.org

Music therapy

[Richmond Music Trust](#) offers music therapy to ADHD/SEN. Contact: Richmond Music Trust. 7, Briar Road, Twickenham TW2 6RB Tel: 020 8538 3866 Email: admin@richmondmusictrust.org.uk

[Otakar Kraus Music Trust](#) offers music therapy to children with special needs, regardless of ability or age. These fun sessions encourage children to experience different ways to explore their imagination in a musical context and to develop their communication and listening skills. The Otakar Kraus Music Trust, 3 Twining Avenue, Twickenham. TW2 5LL Tel: 020 8894 2007 Email: info@okmtrust.co.uk

Neurofeedback

This treatment is valued by those who have tried it. Here's our [video](#) of Dr Neil Rutterford, check out his company [here](#) and see his PowerPoint: [Dr Neil Rutterford – LANC – pp](#)

Occupational Therapy (OT)

[Occupational Therapy](#) can benefit children with ADHD with sensory skills, physical coordination, organization, controlling energy levels, hyperactivity, working out anger and aggression, improving focus, handwriting, social skills, time management. Tel: 020 8891 8136 Visit also [occupational therapy unit](#) For independent services visit [The Royal College of Occupational Therapists](#) Find out how OT can help your ADHD child [here](#)

Osteopathy (including cranial osteopathy)

There are specially accredited osteopaths who advocate gentle manipulation of the head which may relieve certain problems, including stress and digestion difficulties. Contact: [The General Osteopathic Council](#) Tel: 020 7357 6655 Email: contactus@osteopathy.org.uk There are osteopaths based at [The Maris Practice](#).13, Baylis Mews, Amyand Park Road, Twickenham. TW1 3HQ Tel: 020 8891 3400 Email: mail@themarispractice.com Another local osteopath offering treatments is Nargis Ahmad - [Ivy Tree Clinic](#) - Tuesdays to Saturdays - 190, Kingston Road, Teddington. TW11 9JD. Tel: 020 8943 1728

Psychiatry

Referrals are normally made via your GP for both NHS and private. Visit [The Royal College of Psychiatrists](#)

Psycho-education

The National Institute of Health and Care Excellence (NICE) and [European guidelines](#) recommend [psycho-education](#) for the patient and their families as a first step in the treatment of ADHD. Your child will be encouraged to discuss [ADHD](#) and how it affects them. It can help children, teenagers and adults make sense of being diagnosed with ADHD and can help them cope and live with the condition. Ask your Consultant or educational psychologist for more information.

Psychologists

The [NHS](#) can offer psychological therapies (ask your GP or Consultant). Private ADHD child psychologists in Richmond (and search beyond) can be found at the [Association of Child Psychologists in Private Practice - AChiPPP](#)

Psychotherapists

[Counsellors and Psychotherapists](#) in and near Richmond Upon Thames

Relate

This [organisation](#) provides confidential support for ADHD young people aged from 10 to 21yrs at their Richmond Office 1A Hill Street (entrance on Water Lane) Richmond TW9 1SX Tel: 020 8940 8578 Email: counselling@relaterkh.org

Sleep management

Good sleep hygiene is an important aspect of managing ADHD including optimising attention and mood the following day. Sometime medication, a side effect of medication used to treat ADHD, can cause sleep difficulties.

If good sleep hygiene alone is ineffective, medication such as a sleeping tablet (Circadin i.e. melatonin) may be offered by your consultant psychiatrist

Herbal night-time teas can be tried

It's important to remove all electronic visual devices from the bedroom at least 1 hour before bedtime.

ADHD children can benefit from listening to low-level music or talk radio at bedtime

Social skills

Most children with ADHD have trouble with social skills and building friendships. They may choose not to socialise very much because it can be difficult, often because of impulsive acts, and this may cause considerable anxiety. There are often difficulties understanding the unwritten 'social rules'. How close do you stand to another person? Many find it hard to understand or interpret other people's thoughts, feelings or actions, and therefore to understand their intentions. This type of training involves your child taking part in certain 'role play' situations to teach them how to behave in a social setting and how their behaviour affects others around them. Watch this [video](#) and see the [ADHD and social skills – Dr Lax Pericall](#) slides from our Talk on Social Skills. Contact [Richmond Paediatric Speech and Language Therapy Department](#): Tel: 020 8973 3512 (for Kingston 020 8339 8000)

Speech & Language (SaLT)

Those with ADHD may be good at basic communication but struggle with attention and listening; coping with instructions; interacting appropriately for their age; understanding gestures, body language and facial expressions; they may not be aware of what is socially appropriate. Contact [Richmond Community Healthcare](#) Tel:020 8973 3512 or for the [Kingston Team](#) Tel: 020 8339 8000 Private therapists can be found at [The Association of Speech and Language Therapists in Independent Practice](#)

FOR PARENTS

As your child's role model and most important source of strength, it is vital that you live a healthy life. If you are overtired or have simply run out of patience, you risk losing sight of the structure and support you have so carefully set up for your child with ADHD. Having a child with ADHD is highly stressful and exhausting

Parenting courses

Parent training programmes are essential part of understanding ADHD. The NICE guidelines say you should attend these courses, alongside any other treatments your child may be receiving. ADHD Richmond partners with Achieving for Children to produce excellent 123 Magic [Parenting courses](#) if your child is between 2-13 yrs. Register your interest with this [Parenting Self Referral Form Sept 14 1](#)

They are free of charge and we recommend both parents attend, even if it's on separate occasions.

You'll learn how to cope with ADHD; what we know about the cause; and how children feel about the condition. There are 6 workshops in all and by the end you will have met a group of parents who are dealing with exactly the same types of issues relating to the condition. Contact Karen Williams Tel: 0208 5476965 or 07771 974388 Email: karen.williams@achievingforchildren.org.uk

Post-diagnosis sessions

ADHD Richmond has been awarded an NHS contract to provide, to Richmond & Kingston parents of children with ADHD, free post-diagnosis information sessions. Our ADHD advisor, Val Ivens, runs them with our founder, Gill Sears. Book your place via info@adhdreichmond.org

Wellbeing – Look after yourself

- Take care of yourself. Eat well, exercise, and find ways to reduce stress, whether it means taking a nightly bath or practicing morning meditation. If you do get sick, acknowledge it and get help.
- Seek support. One of the most important things to remember in rearing a child with ADHD is that you don't have to do it alone. Talk to your child's doctors, therapists, and teachers. Join our support group for parents of children with ADHD which offers a forum for giving and receiving advice, and provides a safe place to vent feelings and share experiences.
- Take breaks. Friends and family can be wonderful about offering to babysit, but you may feel guilty about leaving your child, or leaving the volunteer with a child with ADHD. Next time, accept their offer and discuss honestly how best to handle your child.

Richmond Carers Centre offer a variety of [workshops & counselling](#) for carers Tel: 020 8867 2380 Email: info@richmondcarers.org

Richmond Wellbeing Service is a free and confidential service for local people who experience depression, anxiety, sadness, anger, extreme shyness, obsessive behaviour, phobias, relationship difficulties or other psychological issues. It offers group workshops, counselling, self-help courses, a range of talking therapies and computer-based therapies. The service is run through a partnership between East London NHS Foundation Trust and Richmond Borough MIND. Contact: [NHS Richmond Wellbeing Service](#) Richmond Royal Hospital, Kew Foot Road, Richmond upon Thames, TW9 2TE Tel: 020 8548 5550 / 020 3513 3266

Live Well Richmond is a free [health improvement service](#) available to anyone over the age of 16 who either lives or is registered with a GP in Richmond. It offers free help and advice to help you develop a healthy lifestyle and improve your health and wellbeing. Tel: 0208 487 1745 Email: info@livewellrichmond.org.uk

MEDICATION

Medication can play an important role in managing moderate to severe ADHD. It can help reduce hyperactivity and improve concentration. The consultants at the [Mental Health Team](#) in Richmond will discuss with you if medication is a good path. This decision is for you and your child/teen. Try to think hard about the areas where your son or daughter is really finding things difficult and ask the consultant if these areas will be improved by the use of a particular type of medication, or if there are other therapies they can suggest. These may also go side by side with the medication. Medication is not right for some children, and, in some cases, there may be other investigations that will need to be carried out to find out if medication is suitable.

Watch our short [video](#) with Prof. Peter Hill

Medications used to treat ADHD are broadly divided in two groups: Stimulants, like methylphenidate Medikinet or Concerta are the brand names used mainly in Richmond and dexamphetamine and Non-stimulants like atomoxetine.

Stimulant medication (methylphenidate) is usually prescribed first. The type of stimulant prescribed will depend on a number of things like the symptoms your child has, your choice of treatment, the ease of giving the medication and even availability/cost of the medication.

ADHD is often treated with stimulant medication which return dopamine to normal levels in the brain. Medication does not cure ADHD – it can only reduce the difficulties it causes. Also, they are very powerful drugs – some are classed as amphetamines – and can carry other health risks.

The reported side effects of stimulant medication for ADHD include difficulty sleeping and appetite loss (common), irritability and mood swings, depression, headaches, upset stomach, dizziness, tics (uncommon), racing heartbeat and high blood pressure (very rare) Sometimes growth slows down when children are on methylphenidate. For these reasons, stimulant medication is only prescribed to children who have been professionally assessed and diagnosed by an expert, and will be reviewed regularly.

Sometimes a child may respond to a different form of methylphenidate or other stimulant or non-stimulant medications may be prescribed.

Most children and young people need the medication at least until they finish their education or schooling. A few might need to take it even when they grow up in order to focus at work. Some children need medications only at specific times, like for example while attending school and do not have to take it on weekends or on school holidays, however, this needs to be discussed with your doctor

Stopping medication can cause symptoms to return, and some young people can put themselves at risk in terms of their education, their work, and socially by being impulsive and taking alcohol or drugs.

Remember: if you have any questions regarding medication, do not hesitate to contact your doctor

SERVICES

Here are some of the local authority and charity services which may be useful to you:

Achieving for Children, our local children's service, has a [Local Offer](#) website containing events & advice

Buddy Up and Travel Buddy This Richmond AID project gives young people the confidence and opportunity to access activities, to participate in their community, and to develop friendships along the way. [Buddy Up](#) matches young people aged 14 to 18 with a volunteer Buddy, and Travel Buddy does the same for those aged 14 to 25, supporting them to access activities and opportunities using public transport. This project aims to give young people with additional needs and/or disabilities the confidence to plan routes, travel to and from activities, and attend activities independently. Tel: 020 8831 6072 Email: info@richmondaid.org.uk

Childcare Brokerage Officers assist parents who are finding it hard to find a suitable [childcare](#) place for have a child with additional needs. Tel:020 8547 6581 Email: early.years@achievingforchildren.org.uk

Family Information Service (FIS) – offers a free telephone and [online service](#) of information for parents, carers, and professionals to assist with supporting children and young people up to 25 years of age. Also - impartial information, guidance and advice sessions at the Borough's Children's Centres about the following: registered childcare options (e.g.: childminders, day nurseries, sessional care), brokerage service for parents who are looking for childcare places, out of school and holiday care, activities for children and young people from birth upwards, support groups, plus career opportunities in childcare and play work. Tel: 020 8547 5215 Email: fis@achievingforchildren.org.uk

Richmond AID (Advice and Information on Disability) is a charity run by and for people with disabilities in the borough of Richmond upon Thames providing a variety of services that include an advice service helpline, a benefits service, an employment project (job club), plus downloadable publications and factsheets and a Disability Information Handbook. [Richmond Advice & Information on Disability](#) 4, Waldegrave Road, Teddington. TW11 8HT Tel: 020 8831 6080 or 07894 215835 Advice Service Helpline: 020 8831 6070 Email: info@richmondaid.org.uk

RUILS Sitting and Befriending Service can help [find a sitter and/or befriender](#) to support families, giving them a break from caring or being a companion to their child or young person and helping them to access social and leisure activities. Tel: 020 8831 6083

See the Local Contacts section for more

HEALTH CARE

Here are some of the health care services which may be useful to you:

Community Paediatrics (Hounslow and Richmond) is a specialist [child health assessment and diagnostic service](#) to meet the needs of children with special or complex health needs. They work very closely with other health professionals, such children's therapies, and also offer joint assessments as well as non-health specialists working in education and social care Tel: Tel: 020 3771 6100 Email: hrch.richmondcompaed@nhs.net

Emotional Health Service: Tier 2 CAHMS Service offers an early response to children and young people experiencing poor [emotional well-being and mild-moderate mental health issues](#). Contact SPA Tel: 020 8891 7969 Out of hours Tel: 020 8770 5000

Hospital Passports: Patients who have learning disabilities can be given a [Learning Disability Hospital Passport](#) by their GP or through their learning disability social services team, just in case they have to be admitted to hospital. These passports can be used to list such important information as personal details, capacity plus level and type of support required, best ways to communicate, behavioural issues (and how to deal with them) past medical interventions, allergies, etc ...

NHS Choices guide for people who have [care and support needs](#), their carers and people who are planning for their future care needs.

A child or young person exhibiting symptoms of ADHD has [special educational needs](#) (SEN). They are highly likely to require support and/or adjustments additional to their peers. Despite often being of average or above intelligence, impaired 'executive functions' can make managing the demands of the school environment, designed for a neurotypical child, really difficult. Common challenges include: staying seated, sustained focused on learning tasks; not calling out during lessons; relationships with peers and teachers; organisation and acting impulsivity particularly when anxious or managing frustration.

Special educational provision may include help with learning and/or with navigating the school environment. Examples include additional adult support or therapeutic intervention such as occupational therapy, social communication and emotional literacy programmes or movement breaks.

A child with ADHD should at the very least be on 'SEN Support' if their needs can be met from the school's own resources. They should have an [Education Health and Care Plan](#) if additional funding is required to meet their needs or a specialist school placement is appropriate. Unfortunately, parents are often given inaccurate information about their child's entitlement to support, it is therefore advisable to contact an organisation independent from school and the local authority for advice.

Subject to few exceptions, a child with ADHD is entitled to the protection of the Equality Act 2010. This means that [reasonable adjustments](#) should be made for him or her to avoid (so far as is possible) the disadvantages they face in school e.g. in the application of the behaviour policy. They should also not be discriminated against, that includes being treated unfavourably because of something arising in consequence of their disability.

There is no doubt that navigating school life and accessing the SEN system can be a real challenge and result in parents losing confidence in the education system. However, with their needs fully identified and understood and with the right provision and placement to meet them, ADHD children can successfully meet their full academic potential.

Our national charity, [ADDISS](#), can offer a variety of training packages for schools focusing on meeting the needs of students with ADHD. Training is delivered by expert ADHD Advisory Teachers. They offer a range of options from short twilight to a full days training and are happy to meet your school individual needs. Topics include "What is ADHD? And how can I support students with ADHD", "ADHD a Learning Difficulty"

In addition, they can offer a one on one consultancy service, where one of their specialist teachers will come to your school and spend a half day observing, meeting and advising about a specific child. This service includes a detailed report that can be used when applying for statutory assessments. Contact us in the first instance to have a chat @ communications@adhdrichmond.org

For more information, relevant to both parents and teachers. please see the [Education](#) tab on our Web Page and also follow the links below:

Educational Psychology Service: If you need to get in contact with the [service](#) directly, please use the most appropriate telephone number below (dependent upon the borough in which your child attends school):

EPS Richmond base, 42 York Street Twickenham TW1 3BZ Tel: 020 8487 5464

EPS Kingston base, The Moor Lane Centre, Moor Lane, Chessington KT9 2AA Tel: 020 8547 6699

EHCP advice and help can be found in the [Send Family Voices Golden Binder](#) Further assistance is offered free by [Independent Support Partnership](#) and by [RUILS](#) and also [Kids Richmond & Kingston](#)

IPSEA (Independent Parental Special Education Advice) offers advice on educational issues, EHC Plans/Statements, tribunals, etc. [General advice line](#): Tel: 0800 018 4016. [Tribunal help line](#): Tel: 0845 602 9579

LEGAL: Part 1 of our [Video](#) of our legal SEN expert, education lawyer, Eva Akins of Russell-Cooke Solicitors talking about Education & law with Part 2 of the [video](#) with Q & A. Here are [Eva Akins' Presentation Slides for ADHD talk 12.4.16](#) Eva also wrote this extensive list of examples of possible adjustments that can be made at school for your child [101 reasonable Adjustments for ADHD.](#)

SEN Advocacy: free legal advice on SEN and educational matters. MeToo&Co offers [a SEN Advocacy Clinic](#) which takes place most Fridays from 9.30am to 2.30pm. Appointments can be booked via email to helen@advocacyandmediation.co.uk or by calling 07702 189889

SENDIASS - Special Educational Needs and Disabilities Information Advice and Support Service or [SENDIASS](#) is a free, confidential and impartial service for parents and carers, children and young people (up to 25 years) Tel: 0208 831 6179 Email: RichmondKingston@kids.org.uk

SOS!SEN - an [independent resource for special educational needs](#) offers a free, independent, confidential telephone helpline for parents and others looking for information and advice. Help with preparing EHC Plans, interpreting the SEN Code of Practice and official letters, locating independent professional experts, advising how to prepare tribunal appeals and helping with complaints to the Local Government Ombudsman. There is a 'walk-in' advice centre in East Molesey available between 10.15am and 12.15pm on the third Wednesday of each month; please see the website for more details. Fontenay, 11a, Creek Road, East Molesey, Surrey. KT8 9BE Helpline: 020 8538 3731 (Monday to Friday 9.30am — 12.30pm and 2.00pm — 5.00pm) Email: admin@sossen.org.uk

There are a number of benefits available for ADHD children & young people as well as the family members who provide care for them. Here's an overview of [Government benefits](#)

Carer's Allowance (CA) is paid to a carer who looks after an ADHD child more than 35 hours a week and earns under a certain threshold. Here's an [overview](#). Conditions are: they must receive DLA at the middle or highest care rate if they are under 16 years old, and for those aged 16 to 64, they have to be in receipt of the daily living component of Personal Independence Payment. You will not be able to receive [Carer's Allowance](#) if you are claiming the State Pension or certain other benefits. You can download a [claim form](#) or to complete your application online. For further information, contact: Carer's Allowance Unit. Mail Handling Site A, Wolverhampton. WV98 2AB Tel: 0345 608 4321 Textphone: 0345 604 5312 Email: cau.customer-services@dwpgsi.gov.uk (Monday to Thursday, 8.30am to 5.00pm; Friday 8.30am to 4.30pm)

Cerebra has a useful [website](#) and [Guides for Parents](#) covers many topics, including claiming DLA for children under 16. Email: enquiries@cerebra.org.uk

Cinema Exhibition Card (CEA) This is a [cinema discount card](#) for carers. Any responsible adult, who goes to the cinema with the child who has ADHD, gets in free. To be eligible the child or young person must be in receipt of DLA. Application forms can be picked up from cinemas. Prove of DLA must be sent together with processing fee of £6 and passport photo of child. Please note children must be 8 years or over to be eligible

Disability Facilities Grant is available up to £30,000 in England for your ADHD/SEN under 18 year old child without parents' income being taken into account. The [DFG](#) has certain criteria.

Disability Living Allowance (DLA) helps with the cost of caring for an eligible ADHD child, under 16 years of age, needing extra looking after and having had these difficulties for at least three months. Just describe your child at his/her worst. Do not understate the problems and be particularly be clear about night-time issues e.g. incontinence, difficulty going to sleep, waking up all the time, tantrums, fits, lack of sleep, etc. (the higher benefit care rate for [DLA](#) is only paid for those with night time problems). It will aid you to obtain a Disability Register Identity Card for your application. Order a printed claim pack by calling the DLA Helpline: Tel: 0845 712 3456 Textphone: 0845 722 4433 (Monday to Friday, 8.00am to 6.00pm) Find out more about [DLA](#).

Disability Register Identity Card (for children and young people) This is invaluable for ADHD children and their parents in Richmond and Kingston to prove that their child is registered with their local authority as disabled. The [disability card](#) can then be used to gain concessions on entrance fees to places where disability concessions apply. Call 020 8547 5600 ext. 4179

Disabled Person's Railcard - is valid for one or three years and entitles the holder to discounts of up to one third off the price of a range of tickets; the same discount also covers tickets purchased by the accompanying adult. Children aged 5 to 16 may also be eligible to hold a Disabled Person's Railcard; in such cases, they should be charged a child's fare; the accompanying parent/carer travelling at the discounted rate mentioned above. To qualify for a [Disabled Person's Railcard](#), the person concerned has to receive DLA/PIP at the higher rate for getting around OR receive DLA/PIP at the higher or middle rate for personal care. Contact Disabled Persons Railcard Office. PO Box 6613, Arbroath, DD11 9AN Tel: 0345 605 0525 (Monday – Sunday, 7.00am to 10.00pm) Textphone: 0345 601 0132 Email: disability@atoc.org

Disabled Students Allowance: For those going into further education there is [disabled funding](#) available

Family Fund: helps families who are raising a disabled (ADHD) or seriously ill child or young person aged 17 or under. Visit their [website](#)

Freedom Pass - Disabled Persons [Freedom Passes](#) are available to ADHD children over the age of 5 who is a permanent resident in the borough and meets the eligibility criteria. The Freedom Pass entitles the holder to free travel on all London transport buses, London Underground, Docklands Light Railway, Croydon Tramlink and train services in the London area (not the Heathrow Express), plus concessionary fares on some of the Thames riverboats. Freedom Passes are also accepted by English local bus companies outside London (9.30am to 11.00pm Monday to Friday, all day weekends and public holidays). Application forms are available from the Accessible Transport Unit (ATU) 020 8831 6312/6191/6097 Email: accessibletransport@richmond.gov.uk Visit the Council website: See also **ZipCard**
